ABOUT ME

Product Engineer with IT experience. Working with some of the most important internet companies across different areas. Got full stack experience creating and managing both websites and apps from the concept stage all the way to publishing. Love learning new things and tools every day. If I do not know something I will learn it.

WORK EXPERIENCE

GITHUB FOSS
Contract, Remote
Aug 2016 - Present

Project Manager

My role is to moderate discussions, answer questions, contribute and review code and handle all the sponsorships that members receive in order to create new apps for GitHub's marketplace.

MOZILLA
Contract, Remote
Dec 2020 - Present

Product Engineer

Machine learning specialist for Firefox Voice and Deep Speech, working both as a software engineer and voice donor. My task is to help localize voice recognition by training chat-bots to communicate in multiple languages as fluently as possible.

HACKERONE
Contract, Remote
Mar 2020 - Present

Cyber Security Consultant

HackerOne was started by security leaders who are driven by a passion to make the internet safer. We partner with the global hacker community to surface the most relevant security issues of our customers before they can be exploited by criminals.

HUNT CLUB
Contract, Remote
Dec 2020 - Present

Information Technology Recruiter

Thanks to my role at GitHub and the Open Source community in general I come in contact with talented programmers every day so it makes sense to connect them with tech companies if they happen to be open to new opportunities.

EDUCATION

MM, SOFTWARE DEVELOPMENT

The University of British Columbia (Canada) | Vancouver

MB, COMPUTER SCIENCE FUNDAMENTALS

New York University Tandon School of Engineering (US) | New York, NY

COURSE

Feb 2020

HARVARD EXTENSION SCHOOL, Advanced professional certifications (APCs) in Data & Computer Sciences for Web Programming, Artificial Intelligence, Mobile Apps and Game Development.

HOBBIES

SOCCER, KAYAKING, MUSIC PUBLISHING, WRITING
